OBJECTIVE

B.E. Computer Science graduate (2025) skilled in Java, Spring Boot, React.js, SQL/NoSQL databases, and cloud technologies. Experienced in building and deploying full-stack applications, working with REST APIs, authentication, microservices concepts, and modern backend tools. Strong problem-solving ability with hands-on project and internship experience.

SKILLS AND INTERESTS

Programming Languages	Java, C#, JavaScript
Frontend	HTML5, CSS3, React.js, Redux
Backend	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Microservices
Databases	MySQL, PostgreSQL, MongoDB
Cloud & DevOps	AWS S3, Docker, GitHub Actions CI/CD, Render, Vercel
Tools & Others	Git, Postman, Redis, Elasticsearch, Razorpay API, Google Maps API
Core Concepts	OOP, Data Structures & Algorithms, RESTful API design, Authentication (JWT)

EDUCATION

Jayawantrao Sawant College Of Engineering Pune

Dec 2021 - June 2025

Bachelors of Engineering in Computer Engineering | CGPA : 7.8

EXPERIENCE

Java developer intern | Veracity Software Pvt. Ltd. (Onsite)

Oct 2025 - Nov 2025

- Completed a hands-on internship focused on **Spring Boot, Microservices, Spring REST, Spring Security, and Spring Cloud**.
- Worked on backend project tasks involving API development, microservice communication, and secure authentication workflows.
- Gained practical experience with real-time development tools, debugging, testing, and best practices used in industry environments.
- Demonstrated consistency, active participation, and strong willingness to learn throughout the training and project work.

PROJECTS

E-commerce Delivery app (Zepto) | [\[Github Link\]](#) | [Live Demo](#)

Aug 2025 - Nov 2025 Present

React js, Spring Boot, PostgreSQL, MongoDB, AWS S3, Redis, Elasticsearch, Razorpay, Vercel, Render, Docker

- Developed a full-stack e-commerce platform with **React.js** frontend and **Java Spring Boot** backend, implementing core functionalities like product listing, cart, checkout, and order management on a small-scale version of Zepto. Hosted the frontend on **Vercel** and deployed the backend on **Render using Docker for containerization**.
- Implemented **Redis** for caching and **Elasticsearch** to improve product search speed and real-time inventory performance; added **Razorpay** for handling online payments.
- Connected backend with **PostgreSQL, MySQL, and MongoDB**, and utilized **AWS S3** for storing product images, ensuring scalable data management and secure cloud storage.
- Implemented **RESTful APIs**, **Postman** testing, and **GitHub Actions CI/CD** pipelines, enabling seamless frontend-backend integration, efficient testing, and automated deployment to GitHub repository

Rental Room Booking App | [\[Github Link\]](#)

Jun 2025 - Sep 2025

React js, Redux, Spring Boot, MySQL, MongoDB, Redis, Elasticsearch, AWS S3, Google Maps API

- Built a full-stack room booking platform with **React.js**, **Redux**, and **Tailwind CSS** for frontend, enabling users to search, view, and book rooms efficiently, with interactive UI and state management.
- Integrated **Google Maps API** to display available rooms on a map with markers, allowing users to see room locations, addresses, and details in real-time.
- Built backend using **Java Spring Boot**, managing **MySQL** for user registration, login, and authentication with **JWT**, and **MongoDB** for storing room details with image URLs, while connecting **AWS S3** for scalable image storage.
- Implemented **RESTful APIs**, tested backend with **Postman**, maintained project versioning on GitHub, and automated deployment using **GitHub Actions CI/CD**.

CERTIFICATIONS

- Certificate in React js, MySQL – Prepinsta Technologies
- Java Full Stack Development – ByteXL Training

ACHIEVEMENTS

- Secured Global Rank 4704 in TCS CodeVita Season 12 (500,000+ participants) and cleared TCS NQT for TCS Digital.
- Solved 200+ coding problems on [LeetCode](#) and [GeeksforGeeks](#).
